

Nora Sharp

New York City, NY | (505) 269-3052 | sharpnora12@gmail.com | <https://nora-sharp-portfolio.onrender.com>

Education

Columbia University

New York City, NY

Bachelor of Science in Civil Engineering | GPA: 3.6/4.0 | Deans List 2025-2026 Graduating May 2029

Concentrating in Construction Management and Geotechnical and Structural Engineering

- **Relevant Coursework:** Fluid Mechanics, Mechanics of Solids, Mechanics, Computer Science for Engineers, Intro to Applied Mathematics, Science and Sensibility

Work Experience

Yip Lab: Separation Innovations | (New York, NY)

November 2025 - Present

Research Intern

- Conduct independent and collaborative research on ion transport through ion exchange membranes, designing and executing 10+ experiments each month to investigate lithium and potassium hydration.
- Analyze experimental data to optimize testing procedures and improve research outcomes, while reading current literature through weekly journal discussions.
- Training on advanced laboratory instrumentation, including ion chromatography data, and refined experimental procedures reducing average measurement error by 88%.

Rocky Mountain Youth Corps | (Albuquerque, NM)

June 2026 - July 2026

Crew Member

- Constructed 15+ Beaver Dam Analogs (BDAs) and completed invasive species removal across 5 restoration sites to improve outfall bench resilience and biodiversity in the Middle Rio Grande district.
- Collaborated with 4 regional agencies and nonprofit organizations on process-based restoration projects addressing drought, wildfire risk, and outfall health.
- Trained on and operated specialized hand tools, including pick mattocks, Mcleods, rock bars, and sledgehammers, while completing physically demanding fieldwork.

McGaughey Civil and Environmental Lab | (Albuquerque, NM)

May 2024 - August 2024

Summer Research Intern

- Conducted membrane characterization for 10+ hydrophilic and superhydrophobic membranes through contact angle measurements and prepared coated membranes for water treatment research.
- Assisted with membrane testing by preparing experimental solutions, troubleshooting scaling issues, and training on advanced laboratory techniques, including scanning electron microscopy.

Activities and Leadership

Columbia University Gardening Club | (New York, NY)

Social Media Chair

May 2025 - Present

- Manage social media content to promote club events, increase student engagement, and organize club events.
- Grew our Instagram following by 20% in the first year, and created a more streamlined information system for viewers interested in attending meetings.

Steel Bridge | (New York, NY)

Fabrication Team Member

September 2025 - Present

- Collaborate with team mates to manufacture and test bridge components for the ASCE Bridge competition.
- Learning to use applications like Autocad 3D and solidworks as well as laboratory machinery.

Columbia University American Society of Civil Engineers | (New York, NY)

Member

September 2025 - Present

- Participate in professional development, networking, and community-building activities.

Additional

Technical Skills: Autocad 3D, Python, Microsoft Office, Technical Writing, Scientific Literature Review
